CUTTING-EDGE
CONNECTIVITY

About Smiths Interconnect

We Offer

Smiths Interconnect is a leading provider of technically differentiated electronic components, subsystems, microwave and radio frequency products that connect, protect and control critical applications in the Defence and Aerospace, Communications and Industrial markets.

Smiths Interconnect is the supplier of choice for safe, efficient and reliable connectivity in railway applications. Our experience in high performance connector solutions, antenna systems, RF components and cable assemblies for rolling stock, signalling and infrastructure results in customer-driven, reliable solutions for our customers.

Our technology brands (EMC, Hypertac, IDI, Lorch, Millitech, Reflex Photonics, RF Labs, Sabritec, TECOM, TRAK and HSI) are synonymous with exceptional performance in technologically advanced, high quality solutions required for a high degree of safety and durability. Our extensive product portfolio includes high reliability electrical connectors and cable assemblies, rugged embedded transceivers, solutions for antenna systems, and a wide range of innovative RF and microwave solutions.

Global Reach with Local Support

Smiths Interconnect is part of Smiths Group plc, a global leader in applying advanced technologies for markets in threat and contraband detection, energy, communications and engineered components. Smiths Group has a presence in more than 50 countries.

Technology Brands

IDI

World's most comprehensive offering of spring probe based solutions, including: contacts, connectors, interposers, semiconductor test sockets, and ATE interfaces. Proven off-the-shelf and custom products deliver the best solution for the customer's specific application.

HYPERTAC

Premium interconnect solutions for electrical and electronic applications requiring optimised quality, performance, and reliability. Hypertac connectors utilise the original high performance hyperboloid contact technology; ideal for harsh environments and safety critical applications.

HSI

Joint venture with Sichuan Huafeng Enterprise Group Co. Ltd, one of the major manufacturers of electronic components in China. Industry-leading connectivity solutions for commercial aerospace and railway markets in mainland China.

SABRITEC

High speed quadax, twinax, fibre optic, filter, coax and triax connectors, contacts and cable assemblies. Custom multi-pin circular, D-Sub rack and panel connectors and MIL-Spec interface type products.

EMC

Board-level components incorporating advanced resistive and signal distribution technologies for a broad range of frequency spectrum applications. Extensive portfolio of RF devices used to attenuate, level, or terminate signals available in a variety of packages and footprints.

LORCH

Innovative solutions for the electronics and communications industries. Ranging from high performance wireless and RF products to micro-miniature, cavity, discrete, waveguide, tunable, ceramic, and tubular filters and integrated assemblies.

REFLEX PHOTONICS

Embedded transceivers and transmit/receive modules for advanced interconnect-based solutions. Targeting high data rate interconnects where ruggedness and radiation resistance are required for defence, space, commercial aerospace and industrial applications.

RF LABS

High performance microwave cable assemblies and coaxial components supporting high performance operations, application-specific premium interconnects for high durability and harsh environments.

MILLITECH

Specialising in the engineering, manufacturing, and testing of millimetre-wave components, assemblies, and fully integrated subsystems for space, SATCOM, test and measurement, radar, and scientific applications.

TECOM

Industry leading innovator of antennas and positioning systems for SATCOM in-flight connectivity, instrumentation, datalink, command & control, and telemetry applications integrated into the world's most advanced commercial and military platforms.

TRAK

High reliability multi-function RF systems, ferrite microwave products, and precision time & frequency systems for defence, commercial aerospace, space, homeland security, and public safety applications.

Applications

Rolling Stock

Safety Control & Command

- Driver Cabin
- Lightning
- Alarms
- Sensors
- Seats
- Door & Brake Control
- Electromagnetic Valves
- Air Conditioning

Rolling Stock

Power Distribution

- Energy Storage Systems
- Inter-vehicles Junctions
- Regenerative Braking Systems

Providing A Competitive Advantage

We offer proven quality, innovative and environmentally friendly solutions conforming to the main international railway standards. We constantly adapt our products to tomorrow's technologies while meeting our customers requirements. Our know-how and application expertise ensure the design and manufacturing of cost effective product platforms as well as completely tailored solutions for the harshest railway conditions. We provide our customers with a competitive advantage when tackling the challenges of higher power, increased data rates, wider bandwidth, and greater connectivity all within a smaller footprint.

- Rolling Stock - Safety Control & Command
- Rolling Stock - Power Distribution
- Signalling
- Station & Information System

Signalling

- Digital Tracking ERTMS/ETCS
- Communication-based Train Control
- Security Equipment

Station & Information System

- Digital Tracking GSM-R
- Ground Communications
- Red Light Traffic Management
- Passenger Information & In-train Entertainment
- Video Surveillance & E-Ticketing

Connectors

Sustainability, Reliability & Safety

Through our Hypertac, HSI, IDI and Sabritec technology brands, we supply application-specific, high-reliability electrical interconnect solutions from platforms to bespoke products. Our reliable contact technologies are the core of our advanced interconnect solutions: Hyperboloid, Spring Probe, High Speed, Fibre Optic and High Power.

**Environmentally
friendly solutions
that conform
to main railway
standards**

Environmentally Sealed Rectangular Plastic

REP Series

- Available with the proven Hypertac® hyperboloid contact technology (up to 20,000 mating cycles) and with the MR screw machined contacts (up to 500 mating cycles)
- Conforms to EN 45545 and EN 50124 standards
- Voltage rating up to 400 V
- Allows wire sections from 0.5 mm² to 2.5 mm² (20-12AWG)
- Shunt function available
- 2, 6, and 12 way standard sealed insulators
- Crimp, straight or bent termination options

Rack & Panel Modular Plastic

B Series

- Compliant to NF F 61-030, 16-101, 16-102
- Hybrid connector: signal, power, coaxial and high speed contacts
- Up to 100 signal 1.50mm contacts
- Interchangeable contact retaining system
- Design adapted to customer footprint and electrical voltage

Mini Modular

H/N Series

- High-density mini modular connectors
- Allows up to 900 contact positions
- Building block system composed of custom module combinations within a connector frame
- Keying system available
- Jackscrews available in half-turn quick disconnect
- Float mountable for blind mating

Rack & Panel Modular Plastic

L Series

- Mixed signal, power, coaxial, fibre optic and pneumatic modules
- Provides up to 200 amp power
- Cable to chassis and rack & panel; plastic backshell with strain relief and half turn quick disconnect jackscrew
- Float mountable for blind mating
- Configurations compliant to EN45545 standards
- Large offering thanks to the modularity
- High reliability contact technology
- Several locking devices and hood are proposed

Data Transfer Rectangular

CEA Series

- Offset grid contact layout, one or two contact rows within dielectric connector body
- 1.5mm nominal pin dia contact size: 3, 5 and 9 contact positions
- Hand solder, dip solder & crimp termination styles

Efficient,
environmentally
friendly & flexible
solutions

Float Mount Modular Metal

LHS/LHZ Series

- Qualified according to SNCF NF F 61-032 standards
- Signal, power, coax and data (Ethernet) modules available
- Float mounting ± 1.25 mm
- Gold plating Hyperboloid contacts with a large crimp section

Rectangular Modular Metal

Hypermod Series

- Conforms to DIN 43652 standard
- Approved by SNCF according to NF F 61-030
- Signal, power, coaxial and 1.2 GHz high speed quadrax contacts available

Heavy Duty Modular Coupler

F Series

- Qualified according to SNCF NF F 61-030 standards
- Hybrid connector: signal, power, data (Ethernet), quadrax & fibre optics contacts available
- Mating safety by guiding and coding pins
- IP68 heavy duty aluminium shell

Heavy Duty

HDC Series

- Designed and tested according to IEC 61373 /IEC 61984 for higher robustness and durability
- Waterproof and anti-corrosion characteristics for harsh outdoor environments
- Up to 650A and 5000V and up to 1000M data transmission speed
- Several signal types supported such as power, signal, and ethernet/fibre optic data and pneumatic
- Pre-assembled cables version available

High Density, High Power, Intercoach Couplers

Transformer Heavy Power Series

- Compliant to: NF F 61-030, 16-101, 16-102 and EN 45545-2 (HL3 for RV22 and RV23)
- High power, up to 300A / 500A
- Straight, angled and shunt termination styles
- Cable section size from 25mm² to 50mm² / 240mm²
- IP66, IP67 rating according to NF EN 60529
- Tortac® High Power Contact (HPT) technology

Supporting on-board services for improved traveller experience

A woman with dark hair tied back, wearing a bright yellow V-neck sweater, is seated on a train. She is looking down at a black smartphone held in her hands. The background is a blurred blue interior of a train carriage. The overall lighting is soft and focused on the woman.

Rugged Circular Metal

M12 Series

- Compact IP67 metal shell
- 360° EMI shielding
- Hyperboloid contact technology
- Compliant with fire and smoke standards
- Straight and right angle 90° rotatable backshell
- Compatible with most commonly used rail cables
- Easy to terminate, field attachable

High Power Quick Release

HBB Series

- Compact and small size for weight savings available in both single and five pole version
- Quick locking device
- Current ratings from 300A to 500A
- 360° EMI/RFI shielding
- IP67 fully sealed
- Robust metal shells
- Finger proof IP2X

Shielded Circular Metal

C Series

- Suitable to EN Railway cables
- High shock & vibration resistance EN 61373 Level 2
- IP67 metal shell
- Hyperboloid gold plating contacts with a large crimp section
- High performance in a smaller space

Circular Metal Transponder

BOA Series

- Compliant to VG95234, MIL-C-5015, MIL-C-26482
- Simple and cost effective installation
- Practically maintenance-free
- Low susceptibility to vandalism
- Vibration tests compliant to IS-402

EMI/EMP Filter

- Intermateable and interchangeable with standard non-filter connectors
- C, L and Pi style EMI filters
- TVS protection meeting the requirements of RTCA D160 section 22 up to level 5

PCB Connectors for Harsh Environments and Complex Electronics

- Low, medium and high density connectors with long life cycle
- Signal, power, coaxial and high speed, RF contacts and spring probes solutions
- Immunity to shock and vibration fretting
- Compact Signal and Ethernet PCB Connectors
- Straight dip, right angle solder, crimp, solder cup and Wire Wrap® terminations
- Board-to-board, cable to board, cable to cable and stacking

RF Components & Cable Assemblies

Advanced Technologies & Solutions

Through our EMC and RF Labs brands, we provide RF/Microwave components including resistive & signal distribution components and cable assemblies for demanding high reliability environments. They target a broad range of frequency spectrum applications and high reliability interconnects supporting high performance operations and they attenuate, level or terminate signals in a variety of packages and footprints.

**Application
specific premium
interconnects for
high durability**

RF Components

- Temperature variable attenuators
- Thermopad® temperature variable attenuators from DC through Ka Band
- High power and small signal fixed attenuators
- RF resistors and terminations including surface mount chips, tab & cover chips, flange mounted and rod types Diamond RF Resistives®
- Surface mount outrigger resistors and terminations
- Surface mount chip equalizers
- Isolators and circulators

Semi-Rigid & Hand Formable Cable Assemblies

- High frequency
- High isolation: up to >100 dB
- Copper or aluminium jackets
- Range of protective coverings available

RF Cable Assemblies

Titan-Flex® Series

- Robust solder termination
- Crush resistant and durable
- Superior electrical performance
- Optimized to 18 GHz

RF Flexible Cable Assemblies

Lab-Flex® Series

- Custom braids for strength
- Field proven up to 50 GHz
- Low loss, up to 40% less loss
- Shielding greater than 90 dB
- Stranded centre conductor version available

Did you know?

Our Lab-Flex® cable assemblies are qualified for harsh environments and support up to 50 GHz.

Hypertac® Hyperboloid Contacts - HC

- Extremely low insertion/extraction forces
- Industry-leading mating cycles (over 20,000)
- No fretting corrosion during life cycle
- Very low contact resistance

Screw-Machined Contacts - MR

- Rail standard contact life up to 500 mating cycles
- Tested signal integrity, no contact interruption >50 ns
- Low level contact resistance and low insertion/extraction forces

High-Speed Contacts

- Twinax, triax and quadrax contacts suitable for high speed signal up to 100 MHz
- Fit various insert arrangements for d-sub, circular, PCB and rack and panel connectors

High-Power Contacts

- Current ratings up to 650A
- Fit various insert arrangements for waterproof modular & circular connectors

Stamped Hyperboloid Contact - HCS

- Ideal for high volumes requiring a fully automated crimping process
- Delivered on reels for crimping machines with automatic feeder lines
- High reliability wire and insulation crimp

Pioneers of Progress

Advancing the world through cutting-edge connectivity

We aim to be the partner of choice for innovative connectivity solutions where reliability, high quality, technical expertise, application knowledge, and a reputation for excellence is vital.
