

Micro-D Twinax Connectors

Micro-D Twinax

Smiths Interconnect offers a complete line of differential Twinax and Quadrx connectors, contacts, and cable assemblies for high speed Ethernet, FireWire, and Fibre Channel applications. Differential pair quadrx and twinax connectors and cable assemblies offer superior performance in high speed matched impedance data-on-demand applications. The signal to signal and signal to shield characteristic impedance is maintained throughout the connector pair. A true twinaxial connector interface ensures signal integrity while minimizing jitter and data rate errors.

Testing Capabilities

Smiths Interconnect Quadrx and Twinax interconnects are characterized for testing eye pattern, jitter, skew, and insertion loss on differential pair 100 ohm high speed gigabit Ethernet applications with a wide variety of testing protocols. We utilize the Agilent E5071C 4 port network analyser to measure the differential pair TDR impedance between Twinax connectors, cable assemblies, and quad cable Ethernet and Fibre Channel interconnect systems ensuring the most accurate acquired signal for high speed communications testing. The E5071C 4 port network analyser is capable of highly accurate 100 ohm differential measurements up to 20 GHz and can measure eye diagrams up to 16 Gbps.

Smiths Interconnect's Micro-D Twinax Connectors (MDTX) offer twinax blind-mate assemblies fitted into a low-profile metallised Micro-D style shell. This series allows for modularity of PCB routing of high speed signalling capable of 100 ohm differential pair matched impedance for IEEE 1394b FireWire and gigabit Ethernet applications in a size 10 twinax contact. These connectors allow for maximum space utilization, ultra-miniature size, high vibration capability and are extremely light weight and modular with true signal integrity. Insert arrangements are available in 2, 4, 6 and 8 way twinax assemblies with mixed signal and power contacts available in hybrid layouts. Connectors are available with locking post mechanisms or blind mate features.

Please consult Smiths Interconnect for unique hybrid layouts and custom shell configurations.
