

Product Change Notification

PCN No: 2021-PCB-13

Date of Notification: October 25, 2021

Notification Type: Product Obsolescence

Products Impacted: KLC068 series connectors

Part Numbers Affected: All KLC068 series part numbers

Dear Valued Customer,

The mold tooling required to manufacture the insulators used in the subject connectors has reached the end of life and is no longer capable of manufacturing product to the excellent level of quality expected from Smiths Interconnect. As a result of this, and declining customer requirements for this product line, effective immediately, we are obsoleting the KLC068 series with no possibility for a last time buy.

As a substitute, we could research the possibility a one-time buy for these connectors with a machined insulator, which would require a material change, and a higher price to cover the additional cost. Or if your requirements are on-going, we can research the cost of replacement mold tools. Please respond by November 30, 2021 if you'd be interested in pursuing one of these alternatives.

Best regards,
Tom Kannally
